

LUCIANO RISPOLI

Founder of the Neo - Functionalism , since the 80s.

He was born in Naples in 1946.

He graduated in Engineering in 1970 and specialised in Clinical Psychology at the University of Naples in 1981.

In 1968 he was among the founders of the Centro Studi “Wilhelm Reich” in Naples and was President from 1980 to 1998.

Former Professor of Health Psychology at the University of Catania, he was President of the Italian Association of Clinical Psychology and Psychotherapy.

Founder of the S.I.F. (*Italian Society for Functional Psychotherapy*) with 12 Institutes and Centers in Italy (Naples, Agrigento, Benevento, Brescia, Catania, Florence, Lecce, Milan, Padua, Palermo, Rome, Trieste).

Founder in 1983 of the *European School of Functional Psychotherapy* (S.E.F.) recognized by the Italian Government and founding member of the EABP Forum, with 5 venues (Napoli, Catania, Florence, Padua, Rome).

He is founder of the *Ecole Internationale de Psychothérapie Fonctionnelle* (E.I.P.F.) Paris and Montpellier, and of the *Escuela Internacional de Psicoterapia Funcional* (E.I.P.F.) Mexico city.

He is member of the *Comité Scientifique International pour la Psychothérapie Corporelle* (C.S.I.T.P.) from the foundation; an honorary member of the *European Association of Body-Psychotherapy* (E.A.B.P.), Honorary President of the *Italian National Association for Body-Psychotherapy* (A.I.P.C.).

He founded and directs the Magazine of S.E.F. "Neo - Functionalism and Integrated Science. Psychology Psychotherapy Psychiatry ", Naples (beginning in December 2012).

He is a member of the Scientific Committee of IPAGS, offering his knowledge on the integrated psycho-physical functioning, about the holistic view of the person and its disorders, in particular for the prevention and assistance in the field of all the stress-related disease.

He developed the Functional Psychology and Psychotherapy.

He has been a therapist whose reflections on his practice have led to research on the psycho-body processes, in the fields of clinical psychology, on individual and group therapy, on training groups, and about problems of childhood and adolescence.

He has formulated the concepts of the Functional model of the Self, of the Basic Experiences of the Self, working on methodology, on theory and techniques, on systems of evaluation of outcome and on diagnosis.

He studied stress for 20 years and has developed a method of assessment and intervention, including a model on work-related stress.

He has set up several projects in collaboration with public health institutions and academia including various master courses. He has also organized several National and International Congresses.

Author of more than 150 articles, has participated in 20 books, and has published 26 books in different countries, including:
